

NAS History

The Academy was first organized in Omaha in 1880, with 75 charter members. The Union Pacific Railroad, which supported the programs to make Nebraska the educational and cultural center of the West, was instrumental in the establishment of the Academy; fifteen of the charter members were associated with the Railroad. Union Pacific provided office space and meeting rooms, and also issued rail passes to high-school and college science teachers and others interested in science, so that they could attend Academy meetings in Omaha. Samuel Aughey, first professor of science at the University of Nebraska and first Director of the University Museum, was the Academy's first president. Among other prominent charter members were Lawrence Bruner, Leavitt Burnham, H. S. Kaley, R.R. Livingston, H.H. Nicholson, and C.D. Wilber.

The Academy was reorganized in Lincoln in 1890-91. Some of the illustrious scholars who were Academy leaders during and following this reorganization were E. H. Barbour, C. E. Bessey, J. S. Kingsley, Roscoe Pound, and G. K. Swezey. In 1895, ecological and environmental studies were begun at the University of Nebraska, and various Academy members were pioneers in these studies, which were especially important during and after the droughts of the 1890s and 1930s. Ecology and environment continue to be emphasized in the Academy's programs.

The Academy was incorporated in 1950 as a non-profit educational organization [Internal Revenue Code, Section 501(c)(3)]. In 2005 the Academy was re-classified as a 501 (c) (3) Private Foundation. Donations are tax deductible. The Academy is not a state agency, and is not sponsored by a particular university, college, or other Nebraska educational organization.

NEBRASKA ACADEMY OF SCIENCES

PRESIDENTS FROM 1880 TO THE PRESENT
